

## 3-2 PLATFORM™

A FORMAT SUPPORTING MULTIPLE GAMES  
STARTING FROM A SINGLE THREE POSITION SOURCE

The Platform initially may consist of three or more “symbol” positions:

- 1) the first being a COMMON POSITION (**CP**),
- 2) next being POSITION ONE (**P1**),
- 3) and the next, POSITION TWO (**P2**),
- 4) other POSITIONS may further be defined by a Game at hand.

Starting with variations of the above, a Game may immediately exist, offer another or more Games.

Each of the positions can be represented by a “symbol”, such as, but not limited to standard playing cards, slot machine symbols, pips, alphabetic, numeric, pictorial, *etc.* The presentation of all categorical positions are presumed to come from the same source and each must be unique.

To be clear and specific by example, all “*CHERRIES*” in a defined connection, row or line is not the same as individual, distinct or otherwise unique *CHERRIES* in that same connection, row or line, each with separately defined colors, ranks, size or characteristics as defined by the Game at hand.

As an example of a Game, let's explore the placement of the **CP** symbol between **P1** and **P2** symbols; This and other placements may vary according to the rules of the defined Game(s).

THERE IS A SIGNIFICANT ADVANTAGE TO THIS SPECIFIED SYMBOL FORMAT: INSTEAD OF USING THE SIMPLE **OCCURANCE** OF A SYMBOL (ANY ORDER), **THE 3-2 PLATFORM™** USES THE **PERMUTATION** (ORDER OR SPECIFIC LOCATION) WITHIN THE ARRAY.

**The 3 SYMBOL advantage is 132,600 possible positions versus only 22,100 !!**

By using the recognition of symbols in specific locations, we form outcomes from **PERMUTATIONS** rather than the simple outcomes of three or more random symbols in any Game.
